About the Cover

Todd Dennen
My childhood was happy and normal. In high school I was active in sports and, as an accomplished guitar musician and creative composer, performed and led student musical groups. After 2½ years of college, mental illness took over my life and I was first hospitalized at 21. I am currently doing well in a group home and participating in a Los Angeles County Department of MH program at Harbor-UCLA Medical Center. I have continued to play the guitar and have developed a unique talent for sketching and painting faces.
