CLINICAL REVIEW
INFECTIONOUS DISEASES | Aztreonam lysine for inhalation: New formulation of an old antibiotic

CLINICAL CONSULTATION
DRUG ADMINISTRATION | Practical considerations for optimal transdermal drug delivery

CASE REPORT
ADVERSE DRUG REACTION | Deep vein thrombosis associated with a single dose of romiplostim in a high-risk patient

CLINICAL REPORT
PHARMACOKINETICS | Pharmacokinetics of tacrolimus and mycophenolate mofetil in renal transplant recipients on a corticosteroid-free regimen

PRACTICE REPORTS
REIMBURSEMENT | Billing for outpatient transplant pharmacy services

PHARMACOECONOMICS | Cost-effectiveness of posaconazole versus fluconazole for prevention of invasive fungal infections in U.S. patients with graft-versus-host disease

NOTE
POSTGRADUATE TRAINING | Value of pharmacy residency training: A survey of the academic medical center perspective

Readers may now listen to AJHP podcasts that feature brief interviews with authors of upcoming AJHP articles. Each podcast is 10–15 minutes long and provides additional details about the authors’ work and its implications on practice. Readers may listen to these podcasts as streaming audio at www.ajhp.org or subscribe to them through iTunes. Feedback or comments regarding this service can be sent to the Journal’s editorial staff at ajhp@ashp.org. Articles with podcasts will be identified with the icon on the title page.

OF SPECIAL INTEREST

Pharmacokinetics of Tacrolimus and Mycophenolate Mofetil in Renal Transplant Recipients on a Corticosteroid-Free Regimen
Without prednisone in the immunosuppressive regimen, patients with a kidney transplant had a higher maximum tacrolimus blood concentration than patients on regimens that included corticosteroids.

Practical Considerations for Optimal Transdermal Drug Delivery
The authors of this Clinical Consultation compiled essential information—not all of which is in product package inserts—about 39 transdermal patches.

Billing for Outpatient Transplant Pharmacy Services
A hospital-based kidney transplantation clinic increased the facility’s reimbursement by billing for outpatient transplant pharmacy services. Revenue from one year’s worth of billings justified the full-time-equivalent pharmacist position but did not offset its total salary.

Astraeon Lysine for Inhalation: New Formulation of an Old Antibiotic
Inhaled astraeon offers an option for achieving high sputum concentrations of an antibiotic effective against gram-negative aerobic bacteria, including Pseudomonas aeruginosa. Delivery of the antibiotic into a patient’s lungs occurs via a special nebulizer system.

The Altera nebulizer system.
