Case Report

967  Instituting Parent Education Practices in the NICU

De Nittis' subject clearly is hesitant and has low balance confidence. Walking down the bank of sand is a challenging task; the surface is shifting beneath her as she places weight on each foot to negotiate the descent. By digging the parasol into the bank, she is trying to broaden her base of support to improve her overall stability and avoid a fall; but if the sand is too soft....
Interaction of Feedback Frequency and Task Difficulty in Children's Motor Skill Learning / Ben Sidaway, Justin Bates, Barbara Occhiogrosso, Jessica Schlagenhauffer, Delany Wilkes

Feasibility, Reliability, and Agreement of the WeeFIM Instrument in Dutch Children With Burns / Anuschka S. Niemeijer, Heleen A. Reinders-Messelink, Laurien M. Dooxielpop, Marianne K. Nieuwenhuis
